

1. Description of the discipline

Name of indicators	Field of knowledge, specialty, educational degree	Characteristics of the discipline	
		full-time education (051, 076)	full-time education (073, 074)
Number of credits - 6	Field of knowledge: 07 "Management and Administration". (code and name)	<i>Normative</i>	
	Specialty: 073 "Management" OP "Administrative Management" (code and name of the specialty)		
Modules - 2	Professional direction: -	Year of preparation:	
Content modules - 4		2020-2021	
Individual research task -		Course	
		<i>2nd</i>	<i>2nd</i>
Total hours - 90/120		Semester	
	<i>3rd</i>	<i>3rd</i>	
Weekly hours for full-time study: classroom - 4 independent student work - 8	Educational degree: Master	Lectures	
		<i>26 years</i>	<i>8 years</i>
		Practical, seminar	
		<i>26 years</i>	<i>8 years</i>
		Laboratory	
		-	
		Independent work	
		<i>38 years</i>	<i>104</i>
Individual tasks:		-	
Type of control:		<i>Exam</i>	

Note.

The ratio of the number of hours of classroom classes to independent and individual work is:

for full-time education -

48/52; (52/68);

for distance learning-

7 / 92,113 (8/106);

2. The purpose and objectives of the discipline

The purpose of the course: formation of theoretical knowledge and development of practical skills of mastering methodological aspects of practical application of bases of formation and realization of agrarian policy of the state, estimation and substantiation of its efficiency and acquisition of skills concerning tools of state regulation of agrarian sector.

Knowledge: theoretical and methodological foundations of agricultural policy of the state and individual countries and blocs and the socio-economic state of agricultural production at the present stage, laws and regulations governing the development of agriculture, food, labor, services, resources, labor and land and their impact on socio-economic development and food security of the country, problems of sustainable development of rural areas, instruments of regulation of the agricultural sector and economic consequences of their application, basic approaches to assessing the level of state support of the agricultural sector, instruments of state regulation of foreign trade.

Skill: implement the content of agricultural policy, form the purpose and system of goals of agricultural policy, analyze the consequences of using certain instruments to regulate the domestic market of agricultural products and foreign trade, determine the level of protection of the agricultural sector using conventional methodology, assess international competitiveness of domestic agricultural production, determine security of the state and the factors influencing it, to analyze the effectiveness of certain measures of budget and tax, credit and financial policy of the state, to substantiate the priorities of state social and environmental policy, to study the mechanism of agricultural policy and develop proposals for its implementation, to organize a system of control and monitoring of agricultural policy in accordance with the chosen development strategy.

2.1 The purpose of studying the discipline

The purpose of studying the discipline: the formation of a system of theoretical knowledge and applied skills and abilities in relation to the tools and methods of agricultural policy of the state.

2.2 Tasks of the discipline

The study of the discipline "Agrarian Policy" involves the formation of the following competencies in students:

№	Type of program competencies	Program competence	Code
1	General	Ability to conduct research at the appropriate level.	ZK 1
2		Ability to communicate with representatives of other professional groups of different levels (with experts from other fields of knowledge / types of economic activity).	ZK2
3		Ability to abstract thinking, analysis and synthesis.	ZK 7
1	Professional (special)	Ability to select and use management concepts, methods and tools, including in accordance with defined objectives and international standards.	FC 1
2		Ability to analyze and apply the principles of laws and trends of development economics, micro- and micro and international economics	FC 17

2.3. Program learning outcomes

As a result of studying the discipline "Agrarian Policy", the student must be able to demonstrate the following learning outcomes:

№	Program learning outcomes	Code
1	Critically comprehend, select and use the necessary scientific, methodological and analytical tools for management in unpredictable conditions.	PR1
2	Have the skills to make, justify and ensure the implementation of management decisions in unpredictable conditions, taking into account the requirements of applicable law, ethical considerations and social responsibility.	PRN 6

3 Curriculum

Approved by the Academic Council SNAU protocol № 9 dated January 25, 2019

Content module 1. Theoretical principles of agricultural policy of the state and agricultural policy of individual countries and blocs

Topic 1. Theoretical foundations of agricultural policy. Features of agricultural production that necessitate state regulation of the industry. Influence of natural conditions on agricultural production.

The current state and trends in agricultural production. Long-term and short-term agrarian problem. Agrarian policy as a component of economic policy of the state.

The concept, essence and principles of agricultural policy. Elements of agrarian policy of the state. The purpose and features of the agricultural economy.

Epistemological origins of the agrarian policy of the state. Institutional bases of formation and development of agrarian policy. Institutional bases of agrarian policy formation. System-synergetic principles of agri-food development. Arguments in favor and against state regulation of the agricultural sector.

Choice of priorities and interest groups in agricultural policy. Model of the process of agricultural policy formation.

The main tasks and system of goals of agricultural policy of the state. Evaluation of the effectiveness of agricultural policy.

State policy on agricultural production during the existence of the Soviet Union.

The essence and mechanism of functioning of the EU SAP. History of origin and main stages of reforming the EU SAP. The main instruments of market policy and support of agricultural prices in the EU.

History and modernity of US agricultural policy. Modern US agricultural policy and its impact on the world agricultural market. The main tools to support agricultural prices and producers' incomes in the United States. Differences between measures to support farmers in the US and the EU.

Topic 2. Transformation of agrarian policy of Ukraine: historical experience and modern practice. Agrarian policy in the historical context. Political and economic aspect of agrarian

transformations. The essence of agrarian reform and the main factors influencing it. Features of land reform in Ukraine, legislative support for the development of agricultural land market infrastructure. Reforming property relations in the agricultural sector of Ukraine. Macroeconomic and institutional factors of agrarian reform.

The structure of agricultural production in Ukraine and the structural policy of the state. Orientations of post-reform development of the agricultural sphere.

Transformation of state regulation of the agricultural sector. Assessment of the level of state support for agricultural production in Ukraine. Regional features of agricultural policy implementation.

Legislative and normative-legal base of modern agrarian policy of Ukraine. Privatization and privatization as components of reforming economic relations in the agro-industrial complex. Prerequisites for privatization and privatization. Components of the privatization and privatization process.

Content module 2. The main priorities of agricultural policy

Topic 3. The main directions of agricultural policy of Ukraine. Purpose and priorities of agrarian policy of Ukraine. Development of competition in the agri-food sector.

Technical policy of the state. Fiscal policy in the agricultural sector. Credit and financial factors of agricultural policy. Features of budget and tax and credit and financial policy in the agricultural sector. Development of competition in the agri-food sector.

Rural development on a sustainable basis. Trends in rural development and social policy of the state in rural areas. The main problems of rural development. Agro-industrial policy related to the problems of agricultural services.

Social policy in rural areas. The labor market in the agricultural sector of Ukraine and the problem of employment of the rural population.

Ecological component of sustainable development. Environmental problems in the agricultural sector of Ukraine and environmental policy of the state.

Topic 4. Food security issues in Ukraine. Food security as a political and economic priority. The level of food security of Ukraine. Formation of the domestic food market in Ukraine. Indicators of self-sufficiency in the main types of food products.

The state of the agricultural economy that produces food, its productivity, efficiency and environmental friendliness. Critically dangerous level of food consumption. Food consumption is one of the main prerequisites for the reproduction and efficient use of labor resources. The problem of food security of the population and its dependence on the solvency of the population. Food security as a special ecological and economic state of the state. A systematic approach to the problem of achieving food security. Assessment of the state of international food security.

Food quality and safety. Trends in food consumption in Ukraine and the world. State policy on food security of Ukraine. Food quality and safety policy.

Content module 3. Features of formation and main directions of agrarian policy of Ukraine

Topic 5. Organizational and economic components of agricultural policy. Systematic agricultural policy.

Agrarian policy in the field of land relations. The essence of land reform and features of its implementation in Ukraine. Improving the mechanism of relations in the system "land tenure - land

use - land use". Creation of new forms of land tenure and management within the existing land relations. The main stages of reforming land relations in Ukraine. The role of the state in the implementation of land reform.

Methods of monetary valuation of agricultural lands and settlements. Experience of foreign countries in reforming land relations. Achieving economic, social and environmental effects from land reform.

Innovation and investment activities in the agri-food sector. Reorientation of investment policy in accordance with production changes in the agro-industrial complex. Improving the investment climate and making the investment process more efficient in the agro-industrial complex. The main directions of investment policy restructuring in the agricultural sector of Ukraine.

Formation of regional agricultural policy. Development of measures aimed at financial support of economic and social tasks of the village. Implementation of practical measures for the implementation of the proposed ideas, taking into account the peculiarities of rural development, the mentality of the rural population, the existing structure of production of export orientation of producers, external factors.

Formation of integrated production structures in the agro-industrial complex. Development of agro-industrial integration: intra-farm, inter-farm, inter-branch and other production and economic cooperative structures; integrated intersectoral companies, associations, corporations. The main areas of structural adjustment of the agro-industrial complex of Ukraine.

Topic 6. Tools for regulating the agricultural sector. System of measures of state regulation of agro-industrial complex. Measures of state regulation of the domestic agri-food market that have an impact on the profitability of agricultural production and measures that do not affect the profitability of agricultural production. Ways to achieve profitability of agricultural production.

State regulation of agri-food markets. Measures of state regulation that stimulate demand for agricultural products and measures that limit the supply of agricultural products.

Tools for restricting the supply of agricultural products: production quota, restrictions on the use of agricultural land. Tools to increase the demand for agricultural products in the domestic market.

Public procurement of agricultural products, direct price subsidies to producers.

Consequences of state intervention in agricultural production and tasks of analysis of agricultural policy of the state.

Classification of tools for regulating agricultural production. Pricing policy in the agri-food market: tasks and main tools. Formation of the pricing system in the agro-industrial complex of Ukraine. Establishing an upper and lower price limit for agri-food products. State administrative control over prices: minimum price, maximum allowable price.

Regulation of markets for production resources used in agricultural production.

Content module 4. Features of regulation of foreign trade in agricultural products

Topic 7. Development of the agricultural sector of Ukraine in the context of globalization of world markets. Growing level of competition in foreign markets. Resource potential and geopolitical position of Ukraine.

Problems of development of the agricultural sector of the economy in the context of globalization of world markets.

Foreign trade prospects of the agri-food sphere of Ukraine.

Problems of assessing the international competitiveness of agricultural sectors of individual countries and regions. Assessment of the competitiveness of food and agricultural raw materials of the region in world and European markets.

Retrospective of Ukraine's foreign economic relations with European countries in the agricultural sector. Historical preconditions of the current international specialization of Ukraine, its current and future place in the world trade system.

The state of foreign economic relations of agricultural enterprises in the region with the world and the EU.

The main vectors of foreign policy interactions: Eurasian, Euro-Atlantic and south-eastern directions, in relation to which the corresponding paradigms of foreign policy thinking are formed.

Integration mechanism and common agricultural policy of the European Union. Horizontal, vertical and international economic integration in the agricultural sector.

Agrarian structural policy. Modeling of agrarian policy of Ukraine. Foreign economic strategies and features of integration processes in the agricultural sector.

Topic 8. Tools for regulating foreign trade in agricultural products. The role of trade in the development of agricultural production. Basic theories of international trade in agri-food products.

The essence and objectives of foreign trade policy of the state in the agricultural sector. The main indicators of the country's international competitiveness in the world agri-food market.

Regulation of world agri-food trade within the WTO. Tools for regulating the import of agri-food products: import duty, import quota, product quality requirements.

Tools for regulating the export of agri-food products: export duty, export subsidy. The impact of regulation of agri-food exports on the world economy and the domestic market of the country that uses it.

General approaches to the regulation of agri-food trade within the WTO. Uruguay Agreement on Agriculture (UUSG) WTO. Requirements for access to the domestic agri-food market in UUSG. Rules for the application of export subsidies within the WTO. Regulation of internal support of agricultural production in accordance with UUSG.

Basic approaches to assessing state support for the agricultural sector. The issue of supporting agricultural production in the current round of negotiations within the WTO.

8.	Tools for regulating foreign trade in agricultural products.	7	6
	Together	38	106

8. Teaching methods

1. Methods of learning by source of knowledge:

1.1. Verbal: story, explanation, conversation (heuristic and reproductive), lecture, instruction, work with a book (reading, translation, writing, drawing up a plan, taking notes, building tables, graphs, etc.);

1.2. Visual: demonstration, illustration, observation;

1.3. Practical: practical work, exercise, production and practical methods.

2. Teaching methods by the nature of the logic of cognition:

2.1. Analytical;

2.2. Synthesis methods;

2.3. Inductive method;

2.4. Deductive method;

2.5. Translational method.

3. Teaching methods for the nature and level of independent mental activity of students:

3.1. Problematic(problem-information);

3.2. Research;

3.3. Partial search (heuristic);

3.4. Reproductive;

3.5. Explanatory and demonstrative.

3.6. Interactive teaching methods -triangle / diamond / concentric circles, discussion in a circle, acquaintances / "icebreakers", making posters / flyers, role-playing games / staging, engines, triads.

4. Active teaching methods - use of technical teaching aids, use of problem situations, disputes, self-assessment of knowledge, simulation teaching methods (based on simulation of future professional activity), crossword puzzle solving, use of training and control tests, use of reference lecture notes, etc.

5. Interactive learning technologies - use of multimedia technologies, spreadsheets, dialogue training, student cooperation (cooperation), model "polylogue", training in pairs, two-four-all together, carousel, ZOOM, knowledge test - Kahoot, etc.

9. Control methods

1. Rating control according to the 100-point scale of ECTS assessment;
2. Carrying out intermediate control during the semester (intermediate certification);
3. Polycriteria assessment of current work of students:
 - the level of knowledge demonstrated in practical classes;
 - activity during the discussion of issues raised in class;
 - express control during classroom classes;
 - independent study of the topic as a whole and individual issues;
 - performance of analytical and calculation tasks;
 - writing essays;
 - test results;
 - production situations;
 - written assignments during tests, etc.

10. Distribution of points received by students (exam)

Current testing and independent work								CPC	Together for modules and VTS	Certification	Final test - exam	Sum
Module 1 - 20 points				Module 2 - 20 points								
3M 1 - 10 p.		MR 2- 10 p.		3M 3 - 10 p.		3M 4 - 10 p.						
T1	T2	T3	T4	T5	T6	T7	T8	15	55 (40 + 15)	15	30	100
5	5	5	5	5	5	5	5					

Rating scale: national and ECTS

The sum of points for all types of educational activities	ECTS assessment	Score on a national scale for the exam
90-100	AND	perfectly
82-89	IN	fine
75-81	WITH	
69-74	D	satisfactorily
60-68	IS	
35-59	FX	unsatisfactory with the possibility of reassembly
1-34	F	unsatisfactory with mandatory re-study of the discipline

11. Methodical support

1. Agrarian policy. Lecture notes for students of 1-2 m course of specialties 051 "Economics", 073 "Management", 074 "Public administration and administration", 076 "Entrepreneurship, trade and exchange activities", 051 "Economics", 076 "Entrepreneurship, trade and exchange activity ", 204" Technology of production and processing of livestock products ", 181 Food technologies", 041 "Electric power, electrical engineering and electromechanics", 208 "Agroengineering", 201 "Agronomy", 202 "Plant protection and quarantine", 206 "Horticulture ». Sumy, SNAU, 2018. 148 p.
2. Agrarian policy. Methodical recommendations for conducting practical classes for students of 1-2 m course of specialties 051 "Economics", 073 "Management", 074 "Public

- administration and administration", 076 "Entrepreneurship, trade and exchange activities", 051 "Economics", 076 "Entrepreneurship, trade and exchange activities », 204« Technology of production and processing of livestock products », 181 Food technologies», 041 «Electric power, electrical engineering and electromechanics», 208 «Agroengineering», 201 «Agronomy», 202 «Plant protection and quarantine», 206 « Garden and park economy ». Sumy, SNAU, 2018. 39 p.
3. Agrarian policy. Methodical recommendations for independent study of the discipline for students of 1-2 m course of specialties 051 "Economics", 073 "Management", 074 "Public administration and administration", 076 "Entrepreneurship, trade and exchange activities", 051 "Economics", 076 "Entrepreneurship, trade and exchange activities », 204« Technology of production and processing of livestock products », 181 Food technologies», 041 «Electric power, electrical engineering and electromechanics», 208 «Agroengineering», 201 «Agronomy», 202 «Plant protection and quarantine», 206 « Garden and park economy ». Sumy, SNAU, 2018. 52 p.
