Projects Experience:

- Joint project "ENHANCEMENT OF CAPACITY BUILDING PROCESS IN QUALITY OF EDUCATION AND RESEARCH AT SNAU AND SSU", funded by the Czech Development Agency - International Summer School "Agro-cooperatives and institutions for rural development", Sumy, (16.07.18-27.07.18), supervisor from SNAU
- European project Erasmus+:KA2 CBHE "From Theoretical-Oriented to Practical Education in Agrarian Studies"/ TOPAS 585603-EPP-1-2017-1-DE-EPPKA2-CBHE-JP (2017-2021), executor
- International scientific project: «Investigating the prospects of creating green energy projects to ensure sustainable development» (Project duration: 23.03.2022-23.09.2024) (Certificate №S092303/2024) (Olha Prokopenko, Estonian Entrepreneurship University of Applied Sciences, Tallinn, Estonia; Academy of Applied Sciences Mazovia, Siedice, Poland; Sumy State Pedagogical University named after A. S. Makarenko, Sumy, Ukraine Stanislav Vasylyshyn, National Scientific Center "Institute of Agrarian Economics", Kyiv, Ukraine; ALC "Institute of Accounting and Finance", Kyiv, Ukraine Nataliia Maslak, Sumy National Agrarian University, Sumy, Ukraine)

Project summary:

This project explores the potential for developing green energy projects to promote sustainable development on a global scale. It provides a comprehensive analysis of current and emerging renewable energy technologies, employing expert assessments, Delphi methods, and statistical analyses to identify the most viable and widely applicable solutions. Special attention is given to calculating the payback period for small-scale green energy initiatives. The findings are presented with a forward-looking perspective on international cooperation in green energy, highlighting specific tools and processes that could enhance collaborative efforts. The project proposes a strategic approach that includes the establishment of investment and venture funds, public support for renewable energy manufacturing, and the creation of resilient industrial complexes. It also study the role of independent small-scale alternative power plants and the development of international networks for alternative energy. In light of global challenges such as climate change and energy security, the project underscores the importance of international collaboration in advancing green energy projects. By focusing on renewable energy programs, countries can reduce their dependence on fossil fuels, enhance regional stability, and drive economic growth. The project provides detailed recommendations on how financial, economic, and technological opportunities and partnerships can be optimized to support sustainable development through green energy initiatives
