#### The following teaching methods will be used during lectures and practical classes:

**Explanation.** Interpretation of concepts, phenomena, principles, terms, etc., mainly during the teaching of new material.

**Educational discussion.** This is a discussion of an important issue, an exchange of ideas between students of higher education and/or a teacher, aimed not only at the assimilation of new knowledge, but also at the creation of an emotionally saturated atmosphere that would contribute to a deep penetration into the truth. **Illustration.** Using presentations and other media content to reinforce material being explained, discussed or tasks being performed.

**Demonstration.** Presentation by the teacher of educational materials in dynamics (use of professional programs, situations, etc.).

Written and oral test tasks. Independent concentration and reproduction of acquired knowledge and skills in conditions of limited time and sources of information.

**Cases.** Algorithmic search for a solution through the use of typical methods, which, unlike the solution of cases, does not require identification of the problem and original approaches to its solution.

**Demonstration and discussion of presentations.** Visual display of the media accompaniment of the oral presentation with elements of the discussion.

Comparison. With its help, common and distinctive features of objects and phenomena are established.

**Exercises.** In their essence, they are multiple repetitions of certain actions or types of activity with the aim of their assimilation, which is based on understanding and is accompanied by conscious control and correction. The following types of exercises are used in the educational process: preparatory (they prepare students of higher education to perceive new knowledge and ways of applying it in practice); introductory (contribute to the assimilation of new material based on the distinction of related concepts and actions); trial (first tasks to apply newly acquired knowledge); training (contribute to the formation of skills in standard conditions: according to a sample, instruction, task); creative (the content and method of execution are close to real life situations); control (mainly educational: written, graphic, practical exercises).

**Analysis method.** Its essence consists in the study of objects or phenomena according to individual signs and relations, in the division into elements, and the understanding of the connections between them.

### 5. EVALUATION BY THE EDUCATIONAL COMPONENT

5.1.1 To assess the expected learning outcomes, it is provided:

| Nº | Methods of summative assessment | Points /<br>Weight in the<br>overall<br>assessment | The date of compilation |
|----|---------------------------------|----------------------------------------------------|-------------------------|
| 1. | Cases                           | 40/40%                                             | 6,13 week               |
| 2. | Individual task                 | 30/30%                                             | 14 week                 |
| 3. | Test                            | 30/30%                                             | 14 week                 |

#### **5.2. Formative assessment:**

5.2.1 To evaluate the current progress in education and understand the areas of further improvement, is provided

| N⁰ | Elements of formative assessment                                                                        | Date           |
|----|---------------------------------------------------------------------------------------------------------|----------------|
| 1  | Testing after learning the topics № 2,4,5,7-10.                                                         | 3 week, 7 week |
| 2  | Verbal feedback from the teacher during classroom work                                                  | constantly     |
| 3  | Oral survey during classes and feedback from the teacher during classroom work                          | constantly     |
| 4  | Conversation and discussion during classroom lectures                                                   | constantly     |
| 5  | Written feedback from the teacher based on the results of the INHW                                      | 6,13 week      |
| 6  | Discussion of situational tasks and presentations on the subject of independent study of the discipline | constantly     |
| 7  | Verbal feedback from the teacher and students after the                                                 | 14 week        |
|    | exam                                                                                                    |                |

Self-assessment can be used as an element of summative assessment and formative assessment.

#### 5.3 Total number of points for EC and rating scale

The total number of points for the educational component is 100 points. 5.3.1 Evaluation scale operating at the University:

|   | The sum of points<br>for all types of<br>educational<br>activities | Evaluation on a national scale                                      |              |  |
|---|--------------------------------------------------------------------|---------------------------------------------------------------------|--------------|--|
|   |                                                                    | For an exam, course project (work),<br>practice, qualification work | For a credit |  |
| ſ | 90 - 100                                                           | excellent                                                           |              |  |
|   | 82-89                                                              |                                                                     |              |  |

| 75-81 | good                                                                 | passed                                                               |
|-------|----------------------------------------------------------------------|----------------------------------------------------------------------|
| 69-74 | anticfactory                                                         |                                                                      |
| 60-68 | satisfactory                                                         |                                                                      |
| 35-59 | not satisfactory with the possibility of retaking                    | not passed with the possibility of retaking                          |
| 0-34  | not satisfactory with obligatory repeated<br>study of the discipline | not passed with<br>obligatory repeated<br>study of the<br>discipline |
