

REVIEW
on the educational and scientific program "Management" of the third
(educational and scientific) level of higher education, specialty D3 Management
field of knowledge D Business, administration and law
at Sumy National Agrarian University

The educational and scientific program (hereinafter - ONP) for training specialists of the third (educational and scientific) level of higher education in the specialty D3 "Management" determines the requirements for the level of education of persons who can begin training for ONP, the list of academic disciplines and the logical sequence of their study, the number of ECTS credits required for the completion of this program, as well as the expected learning outcomes (competences) that an applicant for the educational qualification "Doctor of Philosophy" must possess. The educational and scientific program has been developed in accordance with the requirements of the current legislation of Ukraine.

The implementation of the goal is achieved by an appropriate system of synergy of interdisciplinary relations, an interdepartmental complex of professional training for the acquisition of universal skills of a researcher. The result of the implementation of the educational and scientific program will be the training of highly qualified specialists - doctors of philosophy in the field of knowledge D "Business, administration and law", able to implement the acquired qualifications in the development of Ukrainian science and education and complete their studies by defending a dissertation.

The material and technical, personnel and educational base of SNAU allows to ensure the educational process of all educational components at the proper scientific and methodological level.

The educational and scientific program is aimed at training specialists who are able to produce new ideas, solve complex problems in the field of management and administration, which involves a deep rethinking of existing and the creation of new holistic knowledge and professional practice, apply the latest methodologies of scientific and pedagogical activity, carry out their own scientific research, the results of which have scientific novelty, theoretical and practical significance.

I believe that the educational and scientific program is relevant, meets the requirements of this specialty and should provide high-quality training for applicants of the third (educational and scientific) level of higher education in the specialty D3 "Management" (field of knowledge D "Business, Administration and Law" at Sumy National Agrarian University.
